## **DETAILED ACTION**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

- The primary reasons for allowance for claims 1-8, 10, 12-13, and 16 are the inclusion of a printing method/technique comprising the step of eliminating certain selected alternate pixel rows entirely from the printed rows of higher resolution bitmap by converting the higher resolution bitmap into a downscaled lower resolution bitmap having a reduced number of preserved rows available for printing, said preserved rows including "on" pixels added from the eliminated non-printing rows to help avoid losing image details, and printing the downscaled lower resolution bitmap onto an asymmetrical pixel grid having the first resolution in one axis and the higher resolution in a second axis. It is these limitations, either alone or combined as claimed, that have not been taught, found, or suggested by prior art.
- The primary reasons for allowance for claims 15, 17-18 are the inclusion of the limitation of a method of achieving high quality printing comprising the steps of transforming a first bitmap by eliminating certain pixel rows from a first symmetrical bitmap in order to create a downscaled asymmetrical bitmap having a reduced number of preserved rows available for printing on an asymmetrical pixel grid having a higher resolution in a carriage scan axis and a lower resolution in a media

advance axis, said preserved rows including "on" pixels added from the eliminated non-printing rows to help avoid losing image details. It is these limitations, either alone or combined as claimed, that have not been taught, found, or suggested by prior art.

- The primary reasons for allowance for claims 19-20 are the inclusion of a printing system comprising a writing system for downscaling raster data from a high resolution  $A=B$  bitmap to a lower resolution asymmetrical bitmap where  $A \neq B$  by completely eliminating certain linear sequences of printed pixel rows such as selected non-adjacent pixel rows resulting in a modified bitmap with a reduced number of remaining preserved pixel rows to be printed, wherein said writing system also performs a logical operation comparing "on" pixels in the eliminated non-printing rows with "off" pixels in selected adjacent remaining preserved rows in order to preserve and transfer certain "on" pixels from an eliminated non-printing row to a remaining preserved row for printing. It is these limitations, either alone or combined as claimed, that have not been taught, found, or suggested by prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
